

Nick brings 12 years of construction experience to our team. Nick has been involved in numerous types of construction projects, specializing in custom residential construction. As Assistant Superintendent, he is responsible for overseeing all aspects of a project. His focus is on maintaining safety standards, schedule adherence and quality assurance.

Training

Certification Courses

- OSHA 30hr and 10 hr Safety Cards
- Renovation, Handling Inspections
- CPR / First Aid

Relevant Construction Experience & Accomplishments

Park Avenue: *Rochester, NY 14607*

- Led the renovation of a two story office building. Project was a minor facelift, including the creation of a kitchen/breakroom, a full bathroom, and an office with floating counter tops.

Masters Cove: *Pittsford, NY 14534*

- Supervised the complete demolition and renovation of the master bath. Project included relocating the existing window, revising the floor plan, adding a new large walk-in curbless shower, new custom cabinetry, and granite counter.

Old Mill Road: *Rochester, NY 14618*

- Supervised an addition to the rear of the home expanding the kitchen and dining room, and creating a family room that mimics the existing living room features. The new layout includes a powder room, mud hall, laundry room, pantry and deck, and all new finishes.

Alpine Drive: *Rochester, NY 14618*

- Co-managed the complete renovation of the Master Bath and 1st floor, including the mud hall, family room, kitchen & powder room.

Royal View: *Pittsford, NY 14534*

- Oversaw the renovation of a finished basement including a humidity-controlled wine cellar and a cigar room. Two-story bathroom remodel entails installation of one-piece granite shower floor.

Lake Road: *Webster, NY 14580*

- Assisted with the supervision for the new construction of a 2200SF residence with another 1000SF outdoor deck with tremendous views of both Bay and Lake. Very modern finishes include exposed concrete floors, stainless steel cable stair rails, and many types of tile and stone. The home is equipped with state-of-the-art technology: a high-tech security system, a hi-fi system with speakers installed throughout, an automated system for temperature control and lighting, and motorized insect screens and window shades.
